Project Leader	Dan Niese, RHIT
Sinclair HIM Student Liaison	Michelle Durkin
National HIM Student Liaison	Sha’Ron Mabson

Accomplishments

We successfully held two seminars this membership year, the Fall Seminar – Finding Your Inner Leader and the Spring Seminar – Our Future with ICD-10. The Fall Seminar was held at Kettering Medical Center and offered a total of 4 continuing education units. Topics presented at the Fall Seminar included: Techniques to Professional Networking, an update to the AHIMIA House of Delegates activities, an MVHIMA General Membership Meeting, Who Moved my Cheese and To Be or Not to Be, A Leader in Health IT Initiatives. Good Samaritan North was the site for the Spring Seminar. Topics presented included: Are you ready for ICD-10, Developing your Personal Education Plan for ICD-10-CM/PCS and Change is my Friend...I Think. This seminar counted for 3 Continuing Education Units, in ICD-10, through the American Health Information Management Association (AHIMA).

Once again we showed continued support of the Sinclair Community College and National College Health Information Management degree programs and Professional Practice Experience Site Supervisors by sponsoring the annual pizza party at each college. As always the guest list included Site Supervisors, first and second year students, faculty and members of the MVHIMA Board of Directors. This is always a fantastic networking opportunity for the students.

In the area of membership, we were able to continue to offer low cost membership dues for members in the Active Member category at \$10.00 and carried on the tradition of waiving the dues for HIM students.

MVHIMA continues to be in a good financial position.

Presentation to Mary Dudash-White, MA, RHIA, CCS the MVHIMA Lifetime Achievement award for her many years of dedication to the education of HIM professionals in the Greater Dayton Area.

First Electronic Ballot/Voting with an unprecedented return rate of >40%

First Facebook Group

Recommendations

Financial Strategy – Secure an Audit of the financial records of the MVHIMA

Professional Image/Network – Review the current model of the annual Pizza Party to determine the best method to use to secure the optimal number of student participants in a program where 2/3 of those students attend classes online.

Education Strategy – In light of the needs of the HIM community in regard to the transition to ICD-10 consider having more frequent membership meetings. Attempt to increase the number of corporate sponsors for educational events.

Membership Strategy – Continue to grow our association especially in the Active member category.

Student Liaison Strategy – ensure information exchange between the colleges' HIM program, MVHIMA Board of Directors and the Students.

Respectfully submitted by,
